

# About

At the age of 29 after doing a degree in Maths and Theoretical Physics, a PhD in Quantum Information and a few years out doing a bit of lecturing, then proofreading and web design I have decided that my life's mission is to be a theologian! This blog will chart my course. I am doing a distance learning course with the London School of Theology and am using this website/blog as my personal journal. This website is primarily for me but if you are edified in anything that appears on here then so much the better.
